Universitas Mercubuana – Finance and Accounting System (SubCont MX Global)

Mercu Buana would like to automate their manual system to digital. Accounting software describes a type of application software that records and processes accounting transactions within functional modules such as assets, accounts payable, accounts receivable, journal, general ledger, payroll, and trial balance. It functions as an accounting information system.

The screenshot displays the 'Document Types Table' within the 'Finance & Accounting' module. The table lists various document types with their respective codes, descriptions, number ranges, and creation/update timestamps. A sidebar on the left contains navigation links for different system components.

PROJECTS

STRIVE APP

Projek STRIVE merupakan projek pertama Unzyp dengan PBB (UNDP) yang fokus terhadap pengembangan aplikasi crowdsourcing berbasis Kecerdasan Buatan (AI). Projek ini mengumpulkan data laporan beserta pertemuan musrembang yang ditujukan untuk perencanaan pengembangan desa. Bersama dengan Kementerian Desa dan Pembangunan Daerah Tertinggal (Kemendes), diharapkan aplikasi STRIVE dapat menampung aspirasi masyarakat untuk memajukan desa-desa yang tertinggal. Kami menggunakan teknologi AI berbasis text, gambar, video dan suara yang dipadukan dengan teknologi Large Language Model (LLM) dan speech-to-text untuk dikirimkan ke pemerintah pusat sebagai perencanaan pembangunan.
